

BY PSYCHED LUXURIES

THE FORGE

The system that built a seven-year daily practice into a living operation — three deployed products, an agent fleet, a self-improving codebase. Now it teaches the pattern.

WHAT YOU GET, IMMEDIATELY

The Hive Mind Starter Kit

A real, working second brain — not a demo. Point Claude at it and start talking about what you're actually building.

An Offline Reference App

Installable PWA — prompts, workflow patterns, architecture, checklists, on your phone or desktop, no connection required.

Four Real Skills

Spec, Ship, Close, Improve — the discipline that turns "confident and wrong" into "verified and shipped."

The Loop Library

The actual mechanism behind a system that gets smarter every time you use it, instead of staying exactly as good as day one.

THE CURRICULUM — TWO TRACKS, ONE PRACTICE

Track A — Build the System

Agent orchestration, the specs discipline, self-improvement loops, memory, scheduled automation, deploy discipline — sequenced in the real order it was learned.

Track B — The Practice

Prepared for luxury. In control of your reality. What persists in the mind becomes real. Woven through the build, not bolted on after.
